

# AUArts Portfolio Template

## Tips for Creating an Adobe Multi Page PDF Portfolio

1. We require ONLY 12 pieces of artwork
2. Combine those 12 pieces into a multi-page pdf (see template below)
3. If you have more than one image of an individual art piece (ie: sketchbook or 3D piece), then you may add more pages to your multi-page pdf
4. Please place only one image per pdf page. If you have multiple images of one piece, you may add more pages.
5. To add more pages, use Adobe Acrobat, select **All tools** at the top > **Organize pages** > **Insert** and select more pieces from your files (see example).

6. Please document each piece well in the required fields (see template below) and indicate if it is part of a collection of work (ie: sketchbook).
  - a. Title
  - b. Size (in inches)
  - c. Medium
  - d. Description (up to 50 words), i.e., what the piece means to you
